

ARCHIE ADAMS

Software Developer

PROFILE

I am one of the select 40 Computer Science students on PwC's sponsored degree programme at the University of Leeds. I am a passionate about software development, with a strong commitment to quality, innovation and continuous learning. I have had the privilege of multiple internships in the software development industry, at PwC as part of my degree, as well as at Plusnet and Nuom.

WORK EXPERIENCE

PwC

Software Developer | 2022–2023

In my role as a full stack, agile developer I actively shouldered the responsibilities typical of a graduate position to develop in-house software solutions for the deals and financial environment. My work encompassed frontend development using React, Typescript, and CSS frameworks, while backend development involved .NET with C#, utilizing code-first Entity Framework and SQL databases. Throughout this journey, I gained proficiency in tools such as Postman, Azure DevOps, and SQL Server Management Studio.

My primary focus revolved around a substantial, high-impact project with thousands of users. This experience allowed me to gain valuable insights into the end-to-end development pipeline for large-scale projects, spanning various environments and release processes. My involvement from idea refinement to testing deployment necessitated close collaboration with Project Management, Business Analyst, UI/UX, and Testing teams.

Flying Start Degree Partner | 2020–2024

I was successfully accepted through a multi-stage interview process by PwC to be one of the 40 Flying Start degree students at the University of Leeds to study Computer Science (BSc.).

Plusnet

Software Developer Intern | July 2019

- Programming in Java.
- Using Selenium webdriver to create automated testing scripts.
- Using git for project source control.
- Using IntelliJ IDEA for development.
- Following agile programming practices.
- Shadowing experienced developers.
- Using Jira ticketing system.

Nuom

Web/App Developer Intern | July 2019

- Development with Ionic Angular.
- Using HTML and CSS for UI design.
- Integrating Google Firebase into my project.
- Wireframing app UI designs.

EDUCATION

Higher Education

University of Leeds
2020-2024

Predicted 1st class honours
BSc. Computer Science

A-Levels

Ashfield School | 2020

Computer Science | A
Maths | A
IT | A*
